

## Who we are in a nutshell:

- **A trendsetting company:** We are the leading software development center for NAV on Azure hosting in the world. We always work only with the newest NAV versions and provide constant internal training on the newest functionality. We often find ways to overcome technological boundaries and discover new things in the process. We think we can change how software is provided to companies and we invest heavily in this automation concept, which we call software robotics.
- **One of the biggest NAV teams in Lithuania:** we have senior NAV specialists with more than 15 years of experience. Also we are one of two Dynamic CfMD test centers and a biggest NAV upgrade center in the world. Most of our customers/partners are IT companies outside Lithuania.
- **Truly international and dynamic environment:** We foster Nordic culture. We have the possibility to plan our own work time and work remotely. Our team is friendly, helpful and overall happy people who are actively initiating and participating in loads of internal activities as team buildings, innovation days, table tennis tournaments, etc.
- **Strong professional competence:** You will be supported by senior ERP specialists with more than 15 years of experience in Microsoft Dynamics business.

At this moment our company is looking for the  
**NAV Consultant**

**Your responsibilities would be:**    **What we would expect from you:**

- To prepare test plans and scripts to ensure quality in Dynamics NAV Development and upgrade projects
- To test Functional Microsoft Dynamics NAV solution according to provided test scripts
- To support Microsoft Dynamics NAV Developers with functional knowledge of the product
- At least 2 years experience with Microsoft Dynamics NAV
- Participation in at least 3 Microsoft Dynamics NAV implementation projects
- Good knowledge of NAV Finance module
- Documentation skills and attention to details
- Excellent English skills
- Teamwork
