Day 1

09:00 – 09:30	Intro Participant presentation
09:30 – 10:30	Packages and models Package paradigms, references Binaries vs code Extension and Overlayer packages
10:30 – 11:30	Extensions Extensibility benefits Sealing for Overlaying Extensibility Challenges Moving to Extensions strategies
11:30 – 12:30	Metadata Extensions Creating Enum/EDT extensions Menus/Menu item extensions Table metadata extensions
12:30 – 13:30	Lunch
13:30 – 15:00	Code Extensions Creating Table/Form/Class method extensions Class augmentation concept
15:00 – 15:30	Naming Extensions Best practices for naming extension objects Proper model elements naming
15:30 – 16:30	Events Event terminology Standard events Subscribing to standard events
16:30 – 17:00	Q&A

Day 2

09:00 – 10:00

Events

Pre/Post event
Subscribing to Pre/Post events
Event Handler classes

10:00 – 11:30

Delegates and Model Split

Understanding the model split
Delegates overview
Creating and using delegates

11:30 – 12:30

Lunch

12:30 – 14:00

Chain of command

Chain of command concept
Using chain of command to extend standard methods

14:00 – 15:30

Extending standard reports

Ways to extend standard reports
Customizing a business document
Using new designs

15:30 – 16:30

From overlaying to extensions

CAR Report overview
Running the CAR report
Typical overlaying cases and how to deal with them
Iterative approach
Extensibility Issues and Requests

16:30 – 17:00

Q&A
